SUMMARY

Dynamic **Full-stack Developer** with expertise in the **MERN/Next.js** stack and a strong focus on algorithmic problem-solving. Proven ability to design and implement efficient web applications, leveraging both front-end and back-end technologies. Eager to contribute innovative solutions and enhance user experiences in a collaborative environment.

PROJECTS

Line-A-Link (Ongoing)

October 2025–Current

- Technologies: Next.js, TypeScript, Socket.io
- Engineered a real-time social networking platform for DMRC commuters, utilizing Next.js with TypeScript and Socket.io for real-time connection establishment.
 - Implemented the Breadth-First Search (BFS) traversal algorithm to efficiently link commuters based on overlapping station routes, making daily commutes more engaging.

Book-IT

October 2025 <https://book-it-rosy.vercel.app/>

- Developed and deployed a **fully responsive** and **functional** e-commerce application using the **MERN stack** (MongoDB, Express.js, React, Node.js) with **TypeScript** for enhanced code quality. The application is successfully hosted on **Vercel** and **Render**.
- Created a **persistent, session-based cart system** by generating and utilizing a **mock user ID** for every visitor, ensuring a **unique and seamless** shopping experience for individuals prior to account creation.
- Implemented **comprehensive** front-end and back-end logic, demonstrating end-to-end **mastery** of the full-stack paradigm.

Vibe-com

October 2025 <https://github.com/Aruldeshwai/Vibe-com>

- Delivered a **full-stack mock e-commerce shopping cart** application using the **MERN stack** (MongoDB, Express.js, React, Node.js) to meet the requirements of the Vibe Commerce internship assignment.
- Simulated the core e-commerce flow by managing product display and enabling complete cart functionalities, including adding, removing, and updating items.
- Implemented dynamic total calculations and provided a final, **simulated checkout experience** through a user-friendly modal interface.

EDUCATION

B. Tech (CSE) (2023-2027)		
Dr. Akhilesh Das Gupta Institute of Professional Studies, Delhi		8.47
XII(CBSE) (2022-2023)		
Greenfields Public School, Delhi		89%
X(CBSE) (2020-2021)		
Greenfields Public School, Delhi		93%

SKILLS

Front-end Development: HTML, CSS, JavaScript, React, Next.js, Tailwind CSS, Shadcn, TypeScript
Back-end Development: NoSQL (MongoDB), SQL (NeonDB), Node.js
AI Integration: OpenAPI, GeminiAPI
Operating Systems: Windows, Linux
Version Control: GitHub
Authentication: Clerk, Firebase
Data Structures and Algorithms: C++

ACHIEVEMENTS

Selection for SIH'25 Internal Round: Achieved selection into the internal round of the Smart India Hackathon (SIH '25), highlighting technical innovation and solution viability.
Leadership in Web Application Development: Acted as Team Lead in the successful conceptualization, guidance, and construction of a robust web application aimed at addressing mental health challenges in rural communities.
Technological Deployment: The solution was developed using Next.js with TypeScript, NeonDB for data persistence, GitHub for version control, and OpenAPI integration for enhanced functionality. This project demonstrates leadership and full-stack development capabilities.
